

Dear IFMA Tulsa Chapter,

As the new Coronavirus disease (COVID-19) continues to spread globally, IFMA is working tirelessly to keep the FM community updated with the latest news, resources and information to help with emergency preparedness. As an international organization, with members around the globe and the thousands of facilities which are forced to temporarily close, our FM community continues to be on the front lines responding in ways we never imagined addressing the health and safety of businesses allowing essential services to continue as safely as possible. I am very proud to be part of the FM profession especially in times like these.

We encourage everyone to regularly visit the [US Centers for Disease Control and Prevention](#) and the [World Health Organization](#) as well as [IFMA](#) for the latest front line information on COVID-19. If your business has N-95, P-95 or R-95 or any surgical masks and would like to donate them to healthcare providers visit [MASK MATCH](#).

Together, we will get through this extraordinary challenge. I urge every one of you to take care of yourselves and families, your colleagues and neighbors. Donate where possible or volunteer your time in your community. It's at times like these that our global IFMA community comes together with compassion and caring. We will weather the storm.

Please note that IFMA Tulsa monthly luncheon meetings & tours are on hold until further notice.

Sincerely,

Denise Elias
